PROFESSIONAL EXPERIENCE

Software Development Captain, Outreach Director – FTC Robotics Team

2022- Present

- Lead autonomous coding development for the team's robot missions
- Mentor new members on control systems and programming basics
- Planning and launching a community "Robotics 101" workshop in Fall 2025 for K-8 students
- Developed and published [app](#) on App Store to help improve FIRST team strategy and operations

Team Lead – "404 Page Not Found" International Hackathon Competition

2024

- Led a development team in an international hackathon to build a productivity tool for teachers
- Engineered the Python backend, deployed the app using PythonAnywhere, and integrated HTML-based interfaces
- Won 3rd place out of 300+ teams; received personal praise from educators for practical classroom use

AI for Young Minds (Podcast Host)

2024 – Present

- Created and hosted a podcast simplifying AI topics for middle schoolers
- Covered topics like machine learning, robots, healthcare, and smart assistants
- Planned interviews with university professors from Duke, MIT, and more

Tech Lead – JSCNC Youth Tech Team Internship

2023 – Present

- Led the redesign and deployment of the Jain Study Center of NC's website, improving accessibility and ease of updates
- Coordinated a live demo presentation of the site to over 1000 attendees
- Provide ongoing tech support for digital events, including livestreams, announcements, and equipment setup

Math Tutoring Experience

2023 – Present

- Certified Math Tutor & Computer Science Tutor – Schoolhouse.world
 - Certified SAT Math tutor
 - Tutored students in Pre-Algebra, Algebra I & II, Geometry, and Precalculus
 - Provided one-on-one and small-group academic support, focusing on clear explanations and problem-solving strategies
- Volunteer Math Tutor – Local Community Center
 - Assisted middle school students with foundational math concepts and homework
 - Helped improve student confidence and understanding through personalized support

Student Research @ NCSU

2026

- Created a Multi-agent financial model that used Deep Learning and Random Forest models to predict the market.
- Used the Alpaca API and the Ollama API to pull information and proceed with agentic stock trading
- Elected as winner for my project and presented with professors and coordinators as well as 100+ students.
